English

Burmese

About Me

Motivated final-year ICT student at Rangsit University with a strong foundation in full-stack web development, database integration, and system support. Experienced in building responsive web applications using HTML, CSS, JavaScript, Node.js, Express.js, and MySQL, alongside data analytics using Power BI and Power Query. Strong English communicator seeking an IT & Web Development Intern opportunity to apply technical problem-solving and software development skills to real-world digital solutions.

PROJECTS

Sala Restaurant — Full-Stack Fine-Dining Website

- Built a modern Thai fine-dining restaurant website featuring an interactive digital menu and a responsive user interface.
- Developed Express.js back-end functionality to process online table reservations, contact inquiries, and automated email notifications.

JobTrack — Job Application Tracker Web App

- Created a clean, minimal web application to organize and track applications, interview schedules, and daily tasks.
- Implemented interactive JavaScript logic for dynamic task updates and streamlined workflow organization.

ACADEMIC & DATA PROJECTS

Digital Learning Experience & Data Analytics Study | [Tools: Power BI, Power Query, Quantitative Research]

- Co-led a quantitative research study analyzing digital lecture engagement at Rangsit International College.
- Formulated questionnaire frameworks, collected and cleaned response datasets, and performed statistical data analytics using Power Query and Power BI.
- Prepared visual data dashboards and co-authored the final analytical report and executive presentation.

ACTIVITIES & LEADERSHIP

PR Team Member & Technical Support | RIC ICT Symposium

- Managed ICT International social media channels, writing English promotional updates and coordinating digital event communications.
- Provided technical and operational support for live-streaming broadcasts during virtual academic seminars.

Hackathon Participant | Applied AI Innovation Challenge 2026

- Collaborated in a cross-functional student team to design, build, and pitch an AI-powered software solution under tight competition deadlines.

Peer Mentors 2023

- Guided fellow international students in English on academic transitions, software tools, and university resources, fostering an inclusive learning environment.

SOFT SKILLS

Teamwork and collaboration Problem-Solving Critical Thinking

Attention to Detail Willingness to Learn User-Centered Thinking
